

Welcome to the website of the ACP India Chapter!

ACP is very proud of the establishment of the India Chapter, effective since January 1, 2015. In addition to the Chapter formation, ACP has had a presence in India for over four years. The goals of ACP's presence in India are to serve the needs of internists and internal medicine subspecialists, enhance the quality and effectiveness of health care, and foster excellence and professionalism of physicians in one of the world's fastest developing nations.

Our international chapters play an important role in our outreach efforts and allow us to hear more from practicing internists in the area. Since we opened a dedicated office in India, ACP has hosted multiple lecture series with ACP leadership, a successful national conference, and the inaugural ACP India Chapter meeting. In addition to these accomplishments, the membership growth in India is the highest among any international chapter.

As ACP President, I encourage internists in India to join the College and hope that our current members in India become more involved with the Chapter and its activities. ACP looks forward to opportunities to serve the medical community in India and we hope to connect with you through our membership activities and products.

Sincerely,

Nitin S. Damle, MD, MS, FACP
President, American College of Physicians
